PROFILE

Dedicated and detail-oriented Computer Engineering student with a strong academic standing in First Class. Skilled in web development, programming languages, database management, and hardware design. Experienced in backend development and circuit design. Possesses excellent problem-solving, troubleshooting, teamwork, and communication skills.

EDUCATION

KWAME NKRUMAH UNIVERSITY OF SCIENCE AND TECHNOLOGY

October 2022 - Present

Programme: Bachelor of Science, Computer Engineering

Academic Standing: First Class

Relevant Courses: Artificial Intelligence, Distributed Computing, Computer Organization & Architecture, Computer Networking, Data Structures and Algorithms, Operating Systems, Programming and Problem Solving, Financial Accounting, Object-Oriented Programming.

WORK EXPERIENCE

Maintenance & Improvement Storekeeper Intern

December 2025

Nestle Ghana Ltd., Tema Factory

Internship

- Ensured proper disposal procedures were implemented for all obsolete or damaged personal protective equipment in accordance with organizational policies.
- Conducted regular system verification checks to ensure consistency between physical stock quantities and SAP system records, promptly reporting any discrepancies to appropriate management for corrective action.
- Maintained full responsibility for the security of all stored items and ensured their orderly arrangement within the storage facility to facilitate efficient retrieval and inventory management.
- Collaborated closely with maintenance teams to ensure the timely availability of spare parts for both scheduled preventive maintenance activities and unscheduled corrective maintenance interventions.
- Conducted regular audits of spare parts inventory to maintain stock accuracy, identify discrepancies, and determine replenishment requirements based on minimum stock level thresholds.

Electrical & Automation Engineering Intern

October 2025 – November 2025

Nestle Ghana Ltd., Tema Factory

Internship

- Performed daily readings of electricity consumption meters located throughout the factory premises to monitor energy utilization and facilitate accurate power consumption analysis.
- Executed preventive maintenance procedures on precision weighing scales, temperature sensors, pressure gauges, and metal detection equipment through systematic calibration processes to ensure measurement accuracy and operational reliability.

- Performed corrective maintenance interventions on defective instrumentation, including weighing scales, temperature sensors, pressure gauges, metal detectors, and electrically controlled valve systems, to restore equipment functionality.
- Performed troubleshooting and diagnostic procedures on faults related to electrical systems and the factory automation system, utilizing systematic fault-finding methodologies to identify and resolve technical issues.
- Reported identified electrical faults and system anomalies to the designated supervising engineer, providing detailed technical information to facilitate timely resolution and maintain operational continuity.

Maintenance & Improvement Storekeeper Intern

September 2025 – October 2025

Nestle Ghana Ltd., Tema Factory

Internship

- Maintained strict adherence to hygienic standards and safety regulations in all work activities, ensuring compliance with organizational health and safety protocols.
- Generated manual requisition requests for items that fell below minimum stock levels to prevent inventory shortages and ensure continuous availability of critical spare parts.
- Received goods from suppliers by verifying both quantity and quality specifications in the presence of supplier representatives, and executed proper records management and control procedures to document all incoming materials.
- Processed item withdrawals based on requisitions that were properly authorized and released through the SAP Asset Maintenance Management (SAP-AMM) system, ensuring appropriate records management and control protocols were followed.

IT Intern

September 2024 – October 2024

Nutrifoods Ghana Ltd., Tema

Internship

- Ensured continuous network operation through ISP failover switching during downtime events and ping diagnostics across factory sites and the web reducing unplanned downtime and recovery response times.
- Troubleshooted a wide variety of network and application faults, including biometric scanners and print server failures, access point failures, and IP address conflicts, as well as application-layer issues such as OneDrive merge conflicts, Windows BSODs, VPN service failures, printer driver errors, and Outlook synchronization and authentication errors, restoring operations to normal with minimal user disruption.
- Performed routine preventive maintenance on company hardware, including physical cleaning using compressed air blowers and lint-free cloths, as well as software-side optimization through temporary file removal with disk cleanup, improving system performance and increasing hardware longevity.
- Installed and set up end user devices such as network printers, biometric scanners, and provided guests/visitors access to corporate network infrastructure.
- Documented company's network topology by creating both physical and logical network diagrams, providing clarity on network infrastructure and preventive maintenance.

SKILLS AND INTERESTS

Web Development: HTML, CSS, JavaScript, jQuery, Node.js, Svelte.

Programming Languages: Python, TypeScript, C++.

Scripting Languages: BASH.

Database: Postgres, MySQL, MongoDB

Tools & Technologies: Git, GitHub, Postman

Soft Skills: Problem-solving, Team collaboration, Effective communication, Microsoft Word, Excel, PowerPoint, and Draw.io.

Averaging Typing Speed: 43 WPM

Hobbies & Interests: Video games

PROJECTS

Energy Harvesting with Piezoelectric Footpads

February 2026 - Present

Circuit Design

Worked on a group project to design and build a piezoelectric harvesting system as my final year project. This project converts energy from footsteps into electricity suitable for charging battery backup systems.

Contact Manager App

April 2025

HTML5, CSS3 & JavaScript

Collaborated on a full-stack contact management web application featuring CRUD operations (Create, Read, Update, Delete) with linked-list data structure implementation. Developed a responsive, mobile-first UI with dark mode support and interactive features including contact starring/favourites and JSON export functionality. Successfully integrated frontend JavaScript with custom data structure algorithms to deliver a dynamic, user-centric experience. This project enhanced my proficiency in DOM manipulation, data persistence, collaborative development workflows, and integrating custom data structures into real-world web applications.

Expense Tracker App

December 2024 – April 2025

Backend Development – Node.js, Express.js, MongoDB, JWT

Developed a RESTful API backend application for personal expense management featuring secure user authentication with JWT tokens, comprehensive transaction management (income/expense tracking, editing, deletion), and modular MVC architecture. Implemented robust error handling, CORS support for cross-origin requests, and MongoDB integration for data persistence. Built with a scalable project structure including separate modules for user management and transaction operations, middleware for authentication, and dedicated controllers for each API endpoint.

Shopping Cart App

December 2024

HTML5, CSS3 & jQuery

Developed a feature-rich e-commerce shopping cart application with session management, purchase tracking, and order history functionality. Implemented dynamic pricing with discount calculations, cross-platform responsive design, and WCAG-compliant accessibility features. Built with a mobile-first architecture supporting dark mode and seamless user experience across devices. Leveraged Browser Object Model (BOM) APIs and client-side storage solutions (localStorage/sessionStorage) for

data persistence and state management. I enhanced my expertise in jQuery DOM manipulation, responsive web design principles, and accessibility-driven development.

Budget Buddy Finance App

May 2024 – July 2024

Backend Development – Bun, Hono, TypeScript, Drizzle, Postgresql

Worked on a group project and mentored by 2 senior developers in designing the backend structure for a finance app using Bun and Hono. Worked collaboratively with other developers to understand their requirements and work towards their goals, learning how to work with unfamiliar tech stacks.

LEADERSHIP EXPERIENCE

Academic Board Chairman, FECESA, KNUST

January 2026 - Present

- Carried out tutorial sessions to aid course mates in their learning journey.

Academic Board Chairman, ACES, KNUST

August 2024 – September 2025

- Carried out tutorial sessions to aid course mates in their learning journey.
- Carried out a day's activity to brief junior course mates on their registered courses at the start of each semester.
- Provided a weekly summary of course lessons at the end of the week to aid in revision.
- Paired junior course mates with senior course mates for academic mentorship to promote interaction with students, especially with the very shy ones.
- Provided relevant course materials and software applications to aid learning and practical work.
- Carried out a week-long seminar to educate junior course mates on a course project work.
- Carried out a support scheme to aid students taking supplementary examinations.

EXTRACURRICULAR ACTIVITIES

Claude Builder Club, KNUST

August, 2024 – Present

Member of the Claude Code Club, participating in seminars, and hackathon.

WikiTech Club, KNUST

August, 2024 – Present

Member of the Wikitech Club, participating in seminars, and contributing to the community.

ACES Arduino Club, KNUST

January, 2024 – Present

Member of the Arduino Club, participating in design and programming competitions, enhancing teamwork and technical skills.

ACES Code Club, KNUST

May, 2023 – Present

Member of the Code Club, partaking in several programming competitions, growing technical skills.

CERTIFICATIONS

- AWS Academy Graduate – Cloud Architecting – Training Badge *April 2026*
- AWS Academy Graduate – Cloud Developing – Training Badge *April 2026*
- Cisco Networking Basics *March 2026*
- AWS Academy Graduate – Cloud Security Foundations – Training Badge *March 2026*
- AWS Academy Graduate – Cloud Foundations - Training Badge *February 2026*
- Mimo – Back-End Development *November 2024*
- Mimo – Full-Stack Development *November 2024*

ACHIEVEMENTS / AWARDS

- First in Hardware and Software Challenges in ACES Codefest (Coding Festival), KNUST *August 2025*
- Awarded Name on Chip, Prize for Students with a CWA of 80.0 and above, KNUST *June 2025*
- Awarded COE Excellence Award, Prize for Students with a CWA of 80.0 and above, KNUST *June 2025*
- First in Hardware and Software Challenges in ACES Codefest (Coding Festival), KNUST *July 2024*
- Awarded Name on Chip, Prize for Students with a CWA of 80.0 and above, KNUST *July 2024*
- Awarded COE Excellence Award, Prize for Students with a CWA of 80.0 and above, KNUST *July 2024*
